

'TechCon by tTech'

Leading Managed Information Technology Services Provider, tTech Limited, plans to reshape the way people think of I.T. and business by hosting "TechCon by tTech" on Friday, April 12, 2019. The conference will be staged at the Jamaica Pegasus, Montego Suite and aims to help business owners achieve and maintain sustainable growth through I.T. integration in their daily operations.

KEY INSIGHTS

"TechCon by tTech" will provide key insights on optimizing business through applying the right I.T. strategies, identifying trends, looking at the legal framework and its implication on the use and storage of data, and the ever-pervasive risks of Cyber Security threats. Through tTech's guidance, attendees will learn how they can position I.T. as a growth differentiator in their business strategies and how it can be used as a catalyst for innovation by helping them achieve more dynamic results.

Christopher Reckord, Chief Executive Officer at tTech Limited, reinforces that, "In our ever-expanding digital world, we need technology to either solve a problem or leverage an opportunity. Integrating tech-

Christopher Reckord

technological infrastructure into the business sphere directly affects the culture, efficiency, and relationships." He continues, "At 'TechCon by tTech' we can learn and share ideas about how using the right technology can take care of the mundane in daily business operations."

One-day conference geared towards business growth by leveraging I.T.

At TechCon by tTech, business owners can explore the latest advances in technology and its rapid deployment.

Many may see the integration of technology into their businesses as a costly endeavour. However, the experts at "TechCon by tTech" will share with participants how making use of the right technology creates value from the investments.

DRIVING FORCE

Marcelle Smart, Consulting Manager at tTech Limited who supports value-driven business and IT decision-making states, "I.T. is a driving force and enabler for businesses to attain sustainable growth. It is through effective value analysis and decision making that business owners and managers will increase their Return on Investment (ROI) in technology that enables their business

processes. No matter the size of your enterprise, technology has both tangible and intangible benefits that will help you to produce the results your customers demand."

MISSION TO SIMPLIFY IT

tTech Limited's mission is to simplify the management of I.T. by taking an approach that maximizes the value of technology in businesses while minimizing their costs. Business owners can, therefore, look forward to a conference designed to explore the latest advances in technology, its rapid deployment and the business growth it can afford users island wide. Interested parties are encouraged to visit the tTech Limited website for more information and/or register for "TechCon by tTech" at www.ttech.com.jm.
